100630 - Financial Institutions: Holding Companies and Treasury Centres

100630 – Financial Institutions: Holding Companies and Treasury Centres

Regulation 2.01.1(a)(3)(iii) and (iv) of the DIFC Regulations refers to "Financial Institutions" and "holding companies, treasury companies or such other similar undertakings". but that definition of "financial institution" does not determine the meaning of "Foreign Financial Institution" (FFI) where there is a relevant agreement such as that between the UK and the US to implement FATCA. Removing "holding companies, treasury companies or such other similar undertakings" from the definition of "Financial Institution" in the DIFC Regulations would not change the fact that they are registered as a Local FFI in accordance with the Regulations. Accordingly, the requirements for the relevant groups remain as set out in the first and second bullet points immediately above.

However, because the previous definition of a DIFC registered holding companies and treasury companies some holding company members of financial groups would have registered with the FFA as the Local Financial Institution of a Guarantee Affiliated Group (GAG) for FATCA purposes.

DIFC Entities that were registered by the sponsor as holding companies or treasury centres will be deemed to be exempt, and no additional and unnecessary administrative burden on such groups.

Furthermore for some groups, particularly those with a number of DIFC entities, it may be desirable for some, but not all, of those entities to be registered as Local FFIs.

If an entity registered as a Local FI also comes within the definition of a QNFI under one of the remaining four categories then they will continue to be defined and treated as a QNFI - this may be the case where the entity is a Collective Investment Fund which is managed by a Fund Manager which is itself a Local FI. Where an entity is a Local FI and a QNFI it will be required to be registered as a Local FI but may have the extended definition of Financial Institution included in the FFI Treasury Regulations (which as noted above includes the concept of "holding companies, treasury companies or such other similar undertakings") applied to it. This is in line with current DIFC FATCA guidance that states where an alternative element of the DI Regulations is applied to a DIFC entity, the entity will be required to register as a Local FI. Such entities will be required to register as a Local FI and will be required to comply with the relevant FATCA provisions in Schedule 2 of the FFI Regulations in respect of the FFI provisions of legislation with the effect that the entity will be treated as a QNFI as opposed to a NFFE (or possibly NFFE Passive) for the purposes of FATCA. We refer to this as the "QNFI Election" approach if they wish.

100660 – Financial Institutions: Custodial Institutions: Execution Only Broker

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100660 – Financial Institutions: Custodial Institutions: Execution Only Broker

An execution only broker that simply executes trading instructions or receives and transmits such instructions to another executing broker will not fall into Financial Assets for the account of others as it will not be a Custodial Institution. However such it provides may be a Financial Institution if it falls with the definition of an investment entity.

100700 - Financial Institutions: Custodial Institutions: Trusts

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100700 – Financial Institutions: Custodial Institutions: Trusts

Trusts are usually not in of the opportunities for automatic exchange of information.

A trust can be either a financial institution or an NFE. Where a trust meets one of the definitions of being a financial institution, it is most likely to be an investment entity and the financial assets usually held by the trust will be treated as financial assets held by a financial institution.

For example, shares held in trust may be a Custodial Account maintained by the trust, and therefore, subject to reporting by the trust as the Custodial Institution that maintains the account. This may be the case where a trust such as an Employee Benefit Trust continues to hold Financial Assets, or cash balances, for an employee after they have been granted

Where an Employee Benefit Trust retains shares for the future benefit of employees, but the shares are not allocated, then under most circumstances this right is a future allocation would not be a financial asset and therefore not a financial institution. However, where shares are allocated to an employee, but the trust retains legal ownership of the shares for a limited time, the trust will not be treated as maintaining a financial account for the duration of time it takes to complete the transfer.

Further guidance on trusts can be found at

100740 - Financial Institutions: Investment Entities

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100750 – Financial Institutions: Investment Entities

An entity will be an investment entity if it meets either one of the following two sets of criteria.

Investment Entity Criteria - as an activity test

An entity will be an investment entity if it principally conducts as a business for or on behalf of a customer one or more of the following activities:

- Trading in
  - Money market instruments (cheques, bills, certificates of deposit, derivatives, etc.);
  - Foreign exchange;
  - Exchange, interest rate and index instruments;
  - Transferable securities; or
  - Commodity futures.
- Individual and collective portfolio management; or
- Otherwise investing, administering or managing on money or behalf of other persons. An entity will be regarded as principally conducting these activities as a business if its gross income from performing these activities is at least 50% of the entity's total gross income during the shorter of:
  - The three year period ending on 31 December of the year preceding the year in which the determination is made; or
  - The period in which the entity has been in existence.

Managed Investment Entity

An entity is managed by a financial institution if it is investing on its own account, is managed by a financial institution AND meets the Financial Assets test as described above.

An entity is managed by a financial institution if the financial institution performs, either directly or through another service provider, any of the activities described in the section above (Activity Criteria - as an activity test) on behalf of the entity. A financial institution only manages assets of an entity if it has discretionary authority to manage the entity's assets (whether all of the assets or a portion of the assets of the entity).

An entity may be managed by one or other entities and individuals. If one of the entities or individuals in the management of the entity is a financial institution within the meaning of the agreements then the entity will be treated as managed by a financial institution.

Investment Entity Criteria - as an activity test: Investment Entities: Examples

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100760 – Financial Institutions: Investment Entities: Examples

The following examples illustrate the application of the Investment Entity definition:

- **Investment Adviser** – Adviser Co provides advice on and discretionary management of securities held by some clients. The securities meet the definition of being Financial Assets. Adviser Co's gross income attributable to the activities of providing investment advice and discretionary management of securities, directly or indirectly, comprises more than 50% of Adviser Co's gross income. Therefore, Adviser Co is an investment entity.
- **Entity Carrying on Business Mainly in Investments** – Investment Fund X primarily invests in equities on behalf of customers. Fund X is managed by Invest Co 4, a financial institution. Fund X's gross income consists primarily of dividends and capital gains from its investments. Fund X is an investment entity because its income is primarily attributable to investing, reinvesting or trading in Financial Assets on behalf of its customers.
- **Entity Managed by a Financial Institution** – Investment Partnership LP is a vehicle set up to invest for members' contributions in Financial Assets. It wants to be run right and has to appoint a financial institution to manage its assets. It appoints Manager Co, a financial institution, to manage its assets. Investment Partnership LP is an investment entity because it is managed by a financial institution. The fact that Manager Co is also wholly owned by Investment Partnership LP is irrelevant to this determination.
- **Property Fund Managed by a Financial Institution** – Fund Y is an investment fund that invests solely in real estate (directly or via property funds). Fund Y is managed by Invest Co 2, a financial institution. Fund Y's gross income consists primarily of capital gains from its investments. Fund Y is an investment entity because its income is primarily attributable to investing, reinvesting or trading in Financial Assets on behalf of its customers, even though it invests solely in assets that are not Financial Assets (and are not debt interest in real property).
- **Trading Co** – Trading Co is a company that carries on a business providing advice to clients on investments in Financial Assets and has discretionary authority to manage financial assets on behalf of clients. Trading Co's gross income consists primarily of fees for the provision of investment advice and fees for managing assets. Trading Co is an investment entity because its income is primarily attributable to investing, reinvesting or trading in Financial Assets on behalf of its customers. Trading Co is an investment entity because it primarily conducts as a business one or more of the relevant activities or operations for or on behalf of a customer (even in practice, it is unlikely that such a company would have any clients that are not investors).
- **Entity Trust Managed by a Individual** – Individual A is a trustee of Trust Z. Trust Z is an investment entity because it is managed by a financial institution. Individual A's management of Trust Z is not considered to be carried on as a business and as a result of the relevant activities or operations for or on behalf of a customer, although the gross income is primarily attributable to investing, reinvesting, or trading in Financial Assets, Individual A is not a financial institution. Individual A is not a financial institution because Individual A is not carrying on a business. Individual A is not carrying on a business because Individual A is not carrying on the activities as a professional fiduciary. Individual A is not carrying on the activities as a professional fiduciary because Individual A is not holding himself out to the public as providing such services and Individual A is not receiving compensation that is reasonable arrangement for the trustee to receive for services provided and ordinarily charged by trustees who are in the business of providing such services. Individual A is not receiving compensation that is reasonable arrangement for the trustee to receive for services provided and ordinarily charged by trustees who are in the business of providing such services because Individual A is not receiving any fees for the services. Even if Individual A is receiving fees for the services, Individual A is not receiving fees that are reasonable arrangement for the trustee to receive for services provided and ordinarily charged by trustees who are in the business of providing such services.

100800 - Financial Institutions: Investment Entities: Trusts

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100800 – Financial Institutions: Investment Entities: Trusts

Trusts are treated as entities in all of the agreements for automatic exchange of information. A trust can be either a financial institution or an NFE. Where a trust meets one of the definitions of being a financial institution, it is most likely to be an investment entity and the financial assets usually held by the trust will be treated as financial assets held by a financial institution. For example, shares held in trust may be a Custodial Account maintained by the trust, and therefore, subject to reporting by the trust as the Custodial Institution that maintains the account. This may be the case where a trust such as an Employee Benefit Trust continues to hold Financial Assets, or cash balances, for an employee after they have been granted.

Where an Employee Benefit Trust retains shares for the future benefit of employees, but the shares are not allocated, then under most circumstances this right is a future allocation would not be a financial asset and therefore not a financial institution. However, where shares are allocated to an employee, but the trust retains legal ownership of the shares for a limited time, the trust will not be treated as maintaining a financial account for the duration of time it takes to complete the transfer.

Further guidance on trusts can be found at

100820 - Financial Institutions: Investment Entities: Trust: Trusts Managed by a Financial Institution

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100820 – Financial Institutions: Investment Entities: Trust: Trusts Managed by a Financial Institution

A trust is typically regarded as being managed by a Financial Institution where either one or more of the trustees is a financial institution or has been appointed a financial institution, such as a professional trustee, to manage the assets held by the trust.

Does a Financial Institution Manage the Trust?

A financial institution will manage the trust where it has been appointed by the trustees to carry out the day to day functions of the trust on behalf of the trustees. This goes beyond managing the investments held by the trust and includes activities such as keeping accounts and records and preparing financial statements for the trust.

Does a Financial Institution Manage the Financial Assets of the Trust?

A financial institution will manage the financial assets of a trust where it has the discretion to manage the investments or investment strategy for the assets. This will usually be where the trust has appointed a financial institution to act as investment manager or discretionary fund manager. The appointment of a discretionary fund manager will be evidenced by an agreement between the trustees and the person providing the discretionary management.

Where a trust has appointed a financial institution investment entity management agreement will set out in discretionary management where the trustees make the decision on what investments to make, and those decisions may be taken on behalf of the trustees by the financial institution. Where the financial institution has discretion to make investment decisions without reference to the trustees, it will be an investment manager and investment activity.

Where a trust has appointed a financial institution (FFI) in conjunction with one Cash Security for Support and Mass and The Institution of Directors Accountants in England and Wales (ICAEW) have published guidance on the meaning of "professional fiduciary" and "professional fiduciary activities" for the purposes of trusts. Please note that use of this Account and is to may take the place of UNRO, guidance, and it should be used as a supplementary tool.

100830 - Financial Institutions: Non-Reporting Financial Institutions: Owner Documented Financial Institutions

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

100830 – Financial Institutions: Non-Reporting Financial Institutions: Owner Documented Financial Institutions

The Owner Documented Financial Institution (ODFI) is a concept found in the US FATCA Regulations (s.1.1471-5(f)(2)) which can be used for FATCA purposes (see FATCA Guidance at paragraph 3.5) when it is classified as a Financial Institution.

In general, QNFI classification is intended to apply to closely held passive investment vehicles that are Investment Entities by virtue of being managed by a Financial Institution, where meeting the requirements to be classified as a QNFI will be relatively straightforward. Where an entity is a QNFI, it will be required to register as a Local FI and will be required to comply with the FFI Regulations.

Entities and other arrangements that are treated as trusts or estates under the FATCA Regulations may also be QNFIs if the FFI Regulations in the legislation introduced to bring effect to an Agreement between that jurisdiction and the US.

Investment Entities are treated as financial institutions and as intermediaries with regard to financial accounts and the relevant account is held and maintained in the IFE by a US Financial Institution and is not a US Reportable Account. Investment Entities are required to register as Local FI Registrants. The UK Financial Institution maintaining the accounts(s) will be required to undertake the appropriate due diligence and reporting in respect of the accounts held by the Investment Entity.

Example 1

Where Bank PLC, located in London, has written its group the following entities:

- a subsidiary (SI) located in Edinburgh;
- a branch (B1) located in Paris (a permanent establishment);
- a foreign branch (B2) located in Bahrain (considered a Financial Institution in Bahrain);
- a foreign branch (B3) located in New York;

Under the terms of the Agreement:

- Bank PLC is a Local FI as it satisfies SI will be UK Financial Institutions and report to HMRC;
- S and B1 will be classified under the Agreement as Partner Jurisdiction Financial Institutions and will report to their respective jurisdictions;
- B2 will be classified as a Financial Institution in Bahrain and will report to the Bahrain Financial Institution under the Agreement. Because B2 does not have an Agreement with the US and it is owned and run by Bank PLC, which is a Local FI, B2 will be a Sign in other Requirements. However, it will have to undertake the obligations required under the US Regulations as a Financial Institution; and
- It will report on all persons who hold accounts in the IFE.

Example 2 – Investment Entities and Local FIs

Oceans Bank of Australia has a branch in Jersey, which is a permanent establishment for tax purposes, located in London.

- As it is a permanent establishment for UK tax purposes, Oceans Bank and Australia, fall under the UK Agreement and will need to comply with the UK FI Regulations and reporting and report information as any registrable Financial Accounts to HMRC.

102.2 - Related Entities

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

102.04 – Related Entities

For FATCA, an entity is regarded as being related to another entity if one entity controls the other or the two entities are under common control the "related entity group".

For this purpose, control is generally considered to mean the ownership of more than 50 percent of the value of an entity.

An entity that is a member of a related entity group will not be a Financial Institution if:

- The entity does not have an account with an income or account balance that exceeds $50,000 and is not a member of a related entity group;
- The entity does not have an account with an income or account balance that exceeds $50,000 and is not a member of a related entity group; and
- The entity does not engage in any activity that would cause it to be treated as an investment entity if it were not managed by another investment entity and is not an investment entity.

Investment Entities that have been wound up and have a member of a group to which the investment Entity belongs will not be considered a Related Entity for the purposes of the Agreement.

Where an entity is a member of a related entity group and is not a Financial Institution it is regarded as a Related Entity of each other member of the related entity group.

Where an entity is a member of a related entity group and is not a Financial Institution it is regarded as a Related Entity of each other member of the related entity group.

Examples for Investment Entities

Investment Entities that have been wound up will not be considered a Related Entity as a result of a contribution of cash solely by a member of the group if:

- the member of the group did not receive the cash contribution in exchange for an interest in the Investment Entity; and
- the Investment Entity is treated in the manner of its business.

Investment Entities that have been wound up will not be considered a Related Entity as a result of a contribution of cash solely by a member of the group if:

- the member of the group did not receive the cash contribution in exchange for an interest in the Investment Entity; and
- the Investment Entity is treated in the manner of its business.

102.23 Financial Institutions with only Low Value Accounts

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

The Financial Institution **must not**:

- be an Investment Entity;
- have any account with a balance exceeding $50,000 and must not
- have more than $50 million in assets on its balance sheet at the end of its most recent accounting period; and
- is not a member of a group that includes a depository institution or a custodial institution (what where it is a group with related entities)

102.28 – Investment Entity

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

102.28 – Investment Entity

The UK Regulations mirror the Act 2. Regulations and set out that an entity meets the definition of an Investment Entity where it is, the entity within the scope of either (a) or (b) below:

(a) An investment entity within the meaning of the Investment Entity Criteria

An entity falls within the category "FI" conducts as a business" (see below), for or on behalf of a customer (for example an account holder) one or more of the following activities:

- trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.);
- foreign exchange;
- interest rate and index instruments;
- transferable securities; or
- individual and collective portfolio management; or
- otherwise investing, administering or managing on money or behalf of other persons.

An entity will be regarded as principally conducting these activities as a business if its gross income from performing these activities is at least 50% of the entity's gross income during the shorter of:

- The three year period ending on 31 December of the year preceding the year in which the determination is made; or
- The period during which the entity has been in existence.

(b) An entity managed by another entity that is an Investment Entity in a Financial Institution.

An Entity meets the financial assets test if the entity's gross income is primarily attributable to investing, reinvesting, or trading in financial assets (the financial assets test").

An entity is managed by another entity if the first entity has outsourced all or part of its investment activities to the second entity.

For the purpose of this definition the relevant meaning of "investment" is an "investment "investment" within the meaning of regulation 14 of Part 3A of the Authorised Investment Funds (Tax) Regulations 2006.

The following are investments:

- a security (including shares and loan stock);
- a relevant contract within the meaning of Part 7 of the Corporation Tax Act 2009.

Therefore, an investment Entity that is managed by another entity that is a Financial Institution will only meet if managed by another investment Entity would not be an Investment Entity.

An Investment Entity meets the "financial assets test" if the entity's gross income attributable to such activities is equal to or exceeds 50 percent of the entity's gross income during the shorter of:

- The three year period ending on 31 December of the year preceding the year in which the determination is made; or
- The period that the entity has been in existence (the "financial assets test").

Where an entity's gross income is primarily attributable to investing, reinvesting, or trading in financial assets and the entity is managed by another entity that is a Financial Institution, the entity is treated as principally conducting as a business one or more of the activities described in subparagraph (a) of the definition of an Investment Entity.

Further guidance on when another Financial Institution is managing the assets on behalf of the entity can be found in section 2.56.

The term "investment Entity" does not include an entity that is not a financial institution if it is managed by a financial institution that performs any of the activities described in subparagraph (a) of the definition of an Investment Entity.

Section 2.28 provides further guidance on how the rules apply to Trusts.

102.39 – Personal Investment Companies

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

102.39 – Personal Investment Companies

Personal Investment Companies (or trusts) consider whether they are within the definition of Investment Entity. Similar to the treatment of Trusts where a Personal Investment Company is managed by a Financial Institution it will be an Investment Entity.

103.09 - an Equity or Debt Interest in a Holding Company or Treasury Centre of a Financial Group

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

103.09 – An Equity or Debt Interest in a Holding Company or Treasury Centre of a Financial Group

- Where a Debt Interest (other than separate Financial Accounts) in which Financial Institutions are described in Section 2.28 with a Financial Account where:
  - the debt interest includes one or more Investment Entities or Passive NFEs; and the income derived by such Investment Entities, or Passive NFEs is 50 percent or more of the aggregate income of the Financial Institution; or
  - the interest is established pursuant to written organizational documents of a financial institution described in section 2.28 and one or more Investment Entities or one or more Passive NFEs that are members of the entity for the related entity group.
- The term "Debt Interest" does not include any interest that is held by investors to assets that give rise to such gross to withholdable payments; or
- The interest is established pursuant to written organizational documents of a financial institution described in section 2.28.

17.14. Expanded definition of Related Entity.

Expanded definition of Related Entity. Related Entities are generally defined as one entity that controls another entity or two or more entities that are under common control. Control is defined to include direct or indirect ownership of more than 50 percent of the vote and value in an entity. As provided in the Commentary, even funds with 50% equity and a Related Entity of another fund may be considered Related Entities if they are under common control. Control also includes the power to control the management or governing bodies of an entity. Under this definition, a person that controls an entity that is a financial institution maintaining financial accounts would generally control the entity for purposes of determining whether such entity is a Related Entity of another financial institution. Control may also be established through other means that indicate common control, pursuant to the US Treasury Regulations. Under common control, each of two or more financial institutions would be treated as a Related Entity of the other financial institutions.

28. Transitional challenge resulting from staggered adoption of CRS.

Map

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

103.

Map

The general rule is that a **Passive NFE** is an NFE that is not an Active NFE. The definition of Active NFE essentially excludes Entities that primarily receive passive income or primarily hold assets that produce passive income. Passive income includes dividends, interest, income equivalent to interest, rents, royalties, and annuities. Passive income also includes amounts derived from Cash value insurance contracts and Financial International Organizations, Central Banks, or Holding NFEs of multinational groups. An exception to this is an Investment Entity that is not a Participating Jurisdiction Financial Institution, which is discussed below.

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

Investment Entity

Source URL: http://fsa3.financialservices.gov.uk/pages/Library/Policy/Policy/2007/07_01.shtml

Investment Entity

The term "investment Entity" means any Entity that primarily conducts as a business one or more of the following activities or operations for or on behalf of a customer:

i) trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.); foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures;

ii) individual and collective portfolio management; or

iii) otherwise investing, administering, or managing funds or money on behalf of other persons.

This activities are conducted as a business if the Entity's gross income primarily attributable to such activities is at least 50% of the Entity's gross income during the shorter of: (i) the three-year period ending on 31 December of the year preceding the year in which the determination is made; or (ii) the period during which the Entity has been in existence.

The term "investment Entity" does not include an entity that is not a financial institution if it is managed by an entity that conducts as a business one or more of the following activities or operations for or on behalf of a customer, and that would be a financial institution if it were not managed by such an entity:

(i) trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.); foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures; or

(ii) individual and collective portfolio management; or

(iii) otherwise investing, administering, or managing funds or money on behalf of other persons.

(b) Entities managed by investment entities. The second paragraph of subparagraph (b) of the definition of investment Entity applies to an entity that is managed by an investment entity if the gross income attributable to such activities is at least 50% of the entity's gross income during the shorter of: (i) the three-year period ending on 31 December of the year preceding the year in which the determination is made; or (ii) the period during which the entity has been in existence. For purposes of this subparagraph (b), an entity is managed by another entity if the latter entity has discretionary authority to manage the entity's assets (whether all of the assets or a portion of the assets of the entity) and may perform, either directly or through another service provider, any of the activities or operations described in subparagraph (b)(i) of this definition of an investment Entity. If a group entity is managed by multiple investment entities, the group entity is treated as managed by the investment entity that holds the largest proportionate share of the assets of the group entity. An entity is not managed by an investment entity for purposes of subparagraph (b)(iii) of this definition of an investment Entity if the entity is managed by a financial institution described in subparagraph (b)(i) of this definition of an investment Entity solely because the entity is managed by a financial institution described in subparagraph (b)(i) of this definition of an investment Entity
